

STANLEY®

DS11 DIAMOND CHAIN SAW

The STANLEY® Diamond Chain Saw brings new technology to the concrete cutting industry. Using segments impregnated with diamond and laser welded to the saw's chain, you can cut concrete (including wire or rebar reinforced), brick, concrete block, masonry, or stone.

Whether you are in construction, remodeling, demolition, maintenance, or rescue, Stanley has a saw and chain combination to complete your job efficiently and productively.

DS11 DIAMOND CHAIN SAW

FEATURES

Square corner cut capability is inherent because the DS11 is a chain saw. It cuts square corners without over-cuts and the labor and expense of corner drilling and patching. That's especially important in load-bearing walls where architects and engineers have specified no over-cut. Plunge cut capability of the DS11 allows quick cutting of window, door, conduit, and duct openings in walls and notching and trimming of concrete pipe.

- HTMA quick disconnect couplers included on all models
- Wallwalker® features provides leverage for cutting
- 18 inch bar capacity
- Water lubrication cooling
